Revised January 12, 2015

The BC Government announced a change to its interface for logging on to the mainframe computer. **The replacement of the mainframe interface is now scheduled for January 25, 2015.**

If you use BC OnLine's web interfaces ONLY (www.bconline.gov.bc.ca) then this change will not affect you.

You will be affected if you see the screen below when you logon or if your business has developed a programmed logon / automated interface to access the mainframe. If your business will be affected, please print this announcement and give it to your technical staff.

If you require additional information, please email your questions to BC OnLine at BCOLHELP@gov.bc.ca. We will redirect your questions as appropriate to the Province's Shared Services BC.

An image of the new logon screen from the Test environment is below.

If you logon manually, just follow the instructions.

If you have an automated interface then you will have to change your programming.
